

Voilé Custom Strap Artwork Guidelines [Email artwork files to info@voilestraps.com](mailto:info@voilestraps.com)

Your original vector art will provide you the best reproduction and the fastest turnaround time. File types we accept contain **vector artwork that is saved as an .eps (preferred), .ai, .svg, or .pdf.**

YOUR ART MUST CONTAIN:

- Any/all type must be outlined. Do not embed fonts.
- Any/all strokes must be outlined and no thinner than 0.25 pt.
- All artwork and type must be a single, solid color.
- No type can be smaller than 8pt to remain legible.

Vector artwork is not based in pixels but instead uses mathematical algorithms to draw lines and curves (paths). They are created using programs such as Adobe Illustrator or Corel Draw. When a vector image is scaled to a different size, the image is redrawn using the algorithm, resulting in an image that is just as crisp as the original.

Raster artwork is stored in a series of pixels and then arranged in a pattern to form the image. When you zoom in on a bitmap image you can see the individual pixels that make up that image. These pixels form a jagged, rough edge that when resized, result in poor reproduction. Most design programs will allow you to save a bitmap, .gif, .png or .jpg image as a .eps, or .pdf. This does not necessarily mean that your art file has been converted into vectored art.

WE CANNOT USE ANY ART THAT WAS SAVED FROM A LOW-RESOLUTION BITMAP/JPEG IMAGE FILE.

A \$50 minimum fee may be applied to your order if the provided artwork does not meet our requirements and needs to be re-created. You must then be able to provide an oversized, high-resolution .jpeg or .tiff, of your artwork that is no less than 300 dpi/ppi. Conversion from a high-resolution .jpg/.tiff can generally yield satisfactory results but is comparatively less crisp than vector art. If your artwork contains only text please identify the typeface in which the art was set.
